Economic Modelling

Index to Volume 2
January, April, July, October 1985

Articles – titles

Behaviour of the Liverpool model with weight given to alternative public forecasts. *S. Marwaha* and *D. A. Peel.* 2.1, 33–38

Econometric policy evaluation and expectations. *Wulfheinrich von Natzmer.* 2.1, 52–58

Econometrics and inconsistencies in the national accounts. *Frederick van der Plaeg.* 2.1, 8–16

Economic planning for market economies: the optimality of planning in an economy with uncertainty and asymmetrical information. *Roger A. McCain.* 2.4, 317–323

Economic policy with bounded controls. *Carl-Louis Sandblom* and *John Banasik.* 2.2, 135–148

Evaluation of macroeconomic models. *M. H. Pesaran* and *R. P. Smith.* 2.2, 125–134

Exchange rate devaluation, monetary policy and wages: a general equilibrium analysis for Chile. *D. P. Vincent.* 2.1, 17–32

The Federal Reserve Board MPS quarterly econometric model of the US economy. *Flint Brayton* and *Eileen Mauskopf.* 2.3, 170–292

A general dynamic model of 19th century US population change. *Morton Owen Schapiro.* 2.4, 347–356

Labour migration in a model of North–South trade. *Ian Wooton.* 2.4, 339–346

Modelling the demand for optional classes of local measured telephone service. *Steven B. Caudill.* 2.1, 39–51

A modified procedure for simulation of macroeconometric models. *Rosemary Rossiter.* 2.4, 324–330

Monetary policy in the BOF3 quarterly model of the Finnish economy. *Juha Tarkka.* 2.4, 298–306

Pre-revolutionary Iranian economic policy making. *Robert E. Looney.* 2.4, 357–368

A prototype model of the foreign exchange market of Canada: forecasting capital flows and exchange rates. *Kanta Marwah.* 2.2, 93–124

Qualitative input–output analysis and structural information. *W. H. Holub* and *H. Schnabl.* 2.1, 67–73

Should systems like LINK be used for long-range forecasts and simulations? *Jean-Christian Lambelet.* 2.2, 83–92

Specifying differential cyclical response in economic time series: capacity utilization and demand for imports. *John D. Jackson* and *David J. Smyth.* 2.2, 149–161

Structural stability and model design. *Donald A. R. George* and *Leslie T. Oxley.* 2.4, 307–316

Testing separate models with stochastic regressors. *Naorayex K. Dastoor* and *Michael McAleer.* 2.4, 331–338

The use of macroeconomic models in economic policy making: the Norwegian experience. *Tore Eriksen* and *Jan Fredrik Qvigstad.* 2.1, 59–66

On the use and misuse of the instantaneous speed of adjustment assumption. *John C. Eckalbar.* 2.1, 3–7
